

SUSTAINABLE PALLETS,  
SHIPPING CRATES AND  
LAYER BOARDS

**LIGHTWEIGHT, STRONG AND  
100% RECYCLABLE PALLETS, SHIPPING CRATES  
AND LAYER BOARDS CONSTRUCTED FROM  
HONEYCOMB PAPER CARDBOARD.  
LOGISTICS SOLUTIONS TO CARRY UP TO 750KG.**

**WHAT MAKES A PALLITE® PALLET?**

**DECK**

25mm thick with light, medium and heavy options depending on how much you need your PALLITE® pallet to hold.

**TUBES**

The spirally wound tubes found inside the PALLITE® pallet foot add impressive vertical strength. Our standard tubes have a vertical compression strength of 800kg per pair.

**BASE FRAME**

These can be added to your pallet to make it even stronger for use in the pallet network or suitable for conveyor systems or palletisers.

**PALLET FEET**

Produced from two laminated 'U' profiles glued together to encase the tubes. Bespoke sizes can be manufactured to suit customer requirements. Tubes are typically spaced every 100mm within the pallet foot for maximum load-carrying capability.

# LIGHTWEIGHT, STRONG AND 100% RECYCLABLE PALLETS, SHIPPING CRATES AND LAYER BOARDS CONSTRUCTED FROM HONEYCOMB PAPER CARDBOARD. LOGISTICS SOLUTIONS TO CARRY UP TO 750KG.

## WHAT MAKES A PALLITE® PALLET?

### DECK

25mm thick with light, medium and heavy options depending on how much you need your PALLITE® pallet to hold.

### TUBES

The spirally wound tubes found inside the PALLITE® pallet foot add impressive vertical strength. Our standard tubes have a vertical compression strength of 800kg per pair.

### BASE FRAME

These can be added to your pallet to make it even stronger for use in the pallet network or suitable for conveyor systems or palletisers.

### PALLET FEET

Produced from two laminated 'U' profiles glued together to encase the tubes. Bespoke sizes can be manufactured to suit customer requirements. Tubes are typically spaced every 100mm within the pallet foot for maximum load-carrying capability.

### SHIPPING CRATES

- Easy to construct, no tools or nails needed.
- Strong enough to contain up to 750kg and be double stacked.
- Lightweight - Imagine how much money you could save on fuel if every pallet you sent was up to over 80% lighter than the traditional wooden equivalent.
- 25mm protective honeycomb paper cardboard wall on your pallet boxes.
- Bespoke sizes to fit your consignment.

### LAYER BOARDS & TOP BOARDS

PALLITE's range of layer boards and top boards are designed to provide protection between layers of product during transit or in storage. They can also improve pallet stability and are the ideal layer board for heavier goods stacked on top of each other, whether on pallets or another surface.

### PALLET FEET OR RUNNERS

- PALLITE® pallet feet help reduce the space taken up by whole pallets, available with or without an adhesive layer, stick directly to the bottom of your consignment.
- Reduce your environmental impact thanks to 100% recyclable materials from managed sources.
- No nails or splinters, and no tools required for assembly

*We were looking for a supplier who could respond quickly to our requirements and create bespoke designs to a challenging specification.*

*We have also been working towards reducing our impact on the environment. PALLITE® products are all 100% recyclable, offering fantastic environmental benefits.*

*The team understood our needs perfectly and were extremely helpful.*

Can carry up to 750kg in open-beam racking

### STANDARD / STANDARD PLUS

Optional extra to have a frame long / stringer for conveyor systems

### PREMIUM

Network / Home delivery / Multi-trip.

Can carry up to 500kg in open-beam racking

### PREMIUM PLUS

Can carry up to 750kg in open-beam racking

### SHORT LEAD TIMES

PALLITE® has the UK manufacturing capacity to fulfil bulk orders of all your pallet, shipping crate and layer board requirements to short lead times.

### COST SAVING

Make significant bottom-line savings when air freighted with a potential 80+% reduction in weight compared to wooden alternatives.

### ISPM-15 EXEMPT

Eliminate the need for heat treated pallets and shipping crates.

### STRONG

Pallets that are strong enough to hold up to 750kg in open-beam racking.

### MAXIMISE CAPACITY

Reduce unwanted transport costs by maximising container and vehicle stowage with bespoke sizes available to order.

### MINIMISE DAMAGE

Secure products with edge protectors and layer boards to reduce damage.

### EASY TO ADAPT

Adapt your supply chain seamlessly by adding a base frame to suit your automated conveyor systems and palletisers.

### ENVIRONMENTAL

Reduce your total environmental impact with products made from over 80% recycled materials that are 100% recyclable and from FSC approved, managed sources.

### SAFETY FIRST

The reduced weight of PALLITE®'s pallets and shipping crates helps protect your team from manual handling injuries. Eliminate the risk of cuts and scratches with no nails, an overall cleaner option than wood.
