## HIGH-DENSITY WAREHOUSE STORAGE & SHELVING SOLUTIONS

 **PALLITE<sup>®</sup>**  
BV

## PALLITE® INVESTED IN THE FUTURE

PALLITE® is an award-winning international designer and manufacturer of sustainable, flexible storage units produced in Belgium, UK and the USA from our strong honeycomb paper-based cardboard.

### WHY USE PALLITE® PIX STORAGE?

#### CUSTOM MADE

Available from 3 up to 400 pick-faces per unit.

#### SPACE-SAVING

Reduce the space needed to store your products by combining pick-faces and creating more space in your warehouse.

#### INCREASE PICK EFFICIENCY

Reduce pick times and walk sequences by combining pick-faces to improve your efficiency.

#### STRONG AND DURABLE

Walls constructed from honeycomb paper board and protected edges results in pick-faces that are strong enough to hold up to 500kg in each PALLITE® PIX® storage unit.

#### LIGHTWEIGHT

Lightweight to protect your team from manual handling injuries

#### SUSTAINABLE

100% recyclable and made from materials from managed sources

#### FLEXIBLE

Easy-to-fit interchangeable dividers to quickly flex your space around your products.

#### IMPROVE PICK ACCURACY

Clearly divided and well organised pick-faces with space for labels and tags help you to find products with ease

#### FULLY COLLAPSIBLE WITH NO NEED FOR TOOLS OR SCREWS

Build and dismantle with ease and store flat-packed when not in use to help keep your warehouse layout flexible.

#### FORKLIFT-FRIENDLY

Move the whole unit, empty or full, with ease.

PIX® 32 Twin

PIX® SLOTS 48 Twin

PIX® H SLOTS Angled 96 Twin

PIX® XL Bin Box Twin

PIX® SLOTS 32 Slim

### PIX

PIX® is a high-density, flexible storage unit designed to meet the needs of the modern warehouse. Rapid build, no need for costly installation teams, PIX® can be deployed quickly and without disruption to your operations.

### PIX XL Bin Box

Extra large storage boxes for bulkier stock where traditional pick bins may be too small. Available in either a single or twin sided unit, free up and transform your warehouse space quickly with the flexible PIX® XL Bin Box storage bin units. Produced from our incredibly strong honeycomb paper cardboard, weight capacity across each pick bin is 25kg.

### PIX SLOTS & H SLOTS Angled

Available with Straight or Angled Shelves

PALLITE® PIX® SLOTS is the lighter weight range of storage units, providing the same flexibility as PIX® with a weight capacity of up to 300kg across each unit. Choose between straight or rearward angled shelves to help prevent stock falling from pick bins.

### PIX TROLLEY

Trolley-mounted storage units designed to sit neatly within warehouse bays, optimising space while keeping inventory easily accessible for picking. They provide effortless manual movement and flexible reconfiguration to support fast, efficient e-commerce operations.

### PIX AMR

(Autonomous Mobile Robot) Compatible

AMR-compatible storage units designed for seamless pick-up and movement by autonomous mobile robots, enabling efficient goods-to-person e-commerce picking. Lightweight yet robust, they feature standardised footprints and secure lift points to ensure reliable, high-throughput warehouse operations.

## PIX IN-RACK STORAGE SOLUTIONS

Unlock the full potential of your metal racking with PALLITE® in-rack storage solutions.

Make every inch of warehouse space work harder. PALLITE® delivers a range of in-rack and freestanding shelving systems designed to maximise capacity, improve pick efficiency, and transform under-utilised racking into high-performing storage.

Whether you want to optimise existing bays, add structure and organisation to pallet positions currently holding loose boxes, or install lightweight shelving high within your steel racking, PALLITE® offers a solution built around your operation.

- Your warehouse, optimised
- In-rack shelving to fill existing bays at every level
- Freestanding units for fast additional capacity
- Custom configurations to match SKU dimensions and throughput
- Lightweight yet strong structures that integrate seamlessly with your racking

*“Pallite designed a tailored picking solution for our bottled wines, replacing pallet storage that tied up valuable capacity with a compact system that greatly improved putaway, picking efficiency and overall use of in-bay space”*
